# Affinity Diagram
(in terms of 5Es)

1- Entice

On the website wasn't explained it's more about programming or design

Helps them to know each other before starting the program

A strong Facebook community

Discord, Slack, Instagram, Facebook possibilities to be virtually in touch

when you study digital media, you don't master everything

I chose this program, because it's that kind of art that you can earn money with

You can ask graduates, old students questions before applying

Before starting , you should know Digital Media is just about how people managing to deliver a content

+These programs are good for people who cannot decide on which media part is their favorite

+These programs don't need related backgrounds

These media study programs are new, so they change fast and it's not easy to find consistency in them

2- Enter

Teachers think outside the box

Learning to be vulnerable, honest to perceive yourself and others in team development via games during the first week

Teachers make you go out of the comfort zone

An integrated course to teach Something like how our interactions with the space causes our perceptions of space

More about future speculation and design theory

They cannot talk with the professors on the website

-After covid they sent to home to have online classes, they lost the friendship with the classmates, when they started to know each others

Annoying uni website,when you have to open a lot of pages to reach what you need

Discord, Slack, Instagram, Facebook possibilities to be virtually in touch

When you start the study from online classes, you don't feel it good to chat virtually either

I wish there was a way to know if I as a first semester student choose one special part of this field, which kind of job I will get.

+The teachers spend time to give feedback and teach techniques individually to teh students.

- The first week was a painful challenge

She wishes there were brochures to help the students know more about which material is found on which portal

when the professors knew me from master, PhD time got easier

Future teaching styles

Teaching styles should be arranged according different types of personalities

Online classes has changed digital media courses for better

when twenty students sit and one teacher speak, it doesn't work

The university website should have better contact part with teh professors and classmates

prefer not to have school style teaching at the uni

The course of "App Development"

Discord, Slack, Instagram, Facebook possibilities to be virtually in touch

+ You can feel free to do the projects with any software or even like drawing on the paper

He wishes they could have more dance, singing classes or meeting the actors (like before covid)

You should have opportunities to experience different approaches and the future work possibilities during your education time

They use Canvas app for all the uni work

Linked to the industry

12 Real Projects with companies

You don't get a notification when you got a new note or an email

3-Engage

Some courses are attended in Pixar

Teachers are their employees in their real project in the industry work

Fewer students in the class, better result of teacher and students relationship

-Not enjoying the journey because of the pressure of submitting a lot of assignments,

Some classes include only reading some books to find the answer of some questions

They visited a museum and asked for finding a problem and find a solution with the ux approach

Finding a solution for problems in brainstorming classes

Design students should try to make something new, the l a

Knowing more about the history of each design field is necess for design students

Annoying uni website,when you have to open a lot of pages to reach what you need

The opportunities to work with real industries

miro

Because of not liking of working for others in industry , he satrted PhD

Via Slack channel and emails you can keep in touch with the students and profs

The exam is the result of the real work

4- Exit

- You don't actually know anything professionally but you are expected to know everything

+ You have overlapping skills,these programs teach, so you can find the job, although you don't know yet which approach is your favorite

-After Covid the fim market development got really slow

Annoying uni website,when you have to open a lot of pages to reach what you need

miro

A strong Facebook community

He wishes he could add UX/UI to teh digital media curriculum

5- Extend

finding a job easier

After Covid companies don't accept to train you to then work online for them

The universities should train the students for the "from home working" style more

Discord, Slack, Instagram, Facebook possibilities to be virtually in touch

miro
